

20230411 What Youth

1800h

Bob reading about satire.

iON just consumed the whole internet.

Pentagon alien info dump will be worse than Snowden.

Via upper kingdom?

Putin and Trump both representatives for Bob

16m

@Bert

Robert Dean TikTok referred to Pentagon aliens.

TikTok: 109 earthquakes

Watered down media ecology so everyone is anesthetized, thanks to Bob.

Derailing trains due to sabotage & poles flipping. Both apply.

Already more tornadoes happening in USA than in a whole year (1200).

Tornado alley has moved to AK, Mississippi, TN, and up to NY, related to Mississippi River.

Fat lady getting ready to sing.

New "switch gate".

Bank of Japan / credit Swiss.

25m

@Chad

Are there supposed to be more than 14 rings in the angel diagram once it's in motion?

No but **they loop in and out of themselves**. You're confusing the position with parity.

It's like frequencies in electromagnetic waves? How many EM waves are there? There's a finite amount of frequencies that things fit into frequencies but if you put those in motion they wax in and out of themselves.

Your (Chad's spirograph) diagram is really good because you got it more than most. You're just a little cloudy in the middle. It's not that convoluted. It's clearer. Middle is tight like a spirograph and then you went into manic, phatic communion after that. So tighten up the middle and you'll be able to see it. Your lines aren't wrong, they're just overlapping, crowded. Back it off and it will open.

27m

Limited number of possible frequencies reminded me of triangulation “spirograph is more appropriate way to calculate frequencies.”

It's because frequencies repeat, spirograph repeats.

Chad has the original symbols, that's why we're able to have this conversation.

29m

Connecting dots in relation to dial-a-mile and putting rings of angel diagram in motion. Are they the same dots?

iON: hmmm... put them in motion and you'll see.

We don't want to spoil it. It would be like saying “take vinegar and baking soda, put it in a bowl and see what happens” and then telling you what's going to happen.

30m

Show your work: do exercises, as vinegar and baking soda overflow, document it.

Best asset you have is Dr. Carolyn Dean because only she has those symbols. She might educate you to clear cobwebs of your mind. Talk sweet.

31m

Etch-a-sketch. Right justification. Can only go X and Y axis, always square. One knob up down and other left right. That's the axes that always have to fit. Make lines, go across and set horizon. Then make picture, go up, down. You can twist a little to make curves but can't make big circles.

Etch-a-sketch and quantization / auto tune

If you square something, it must have a numerical value to square. As opposed to cube. You must have a mark to do that to. You have to have something to take to the tenth power. That's the same thing you're talking about here. Once you have that baseline, you can take it to infinity and beyond.

33m

Quantization aspect is same as justification. It's also tiniest iota, tiniest part. The divided atom. Because what is bound on earth is bound in heaven.

Humans think that for something to be wonderful it has to be big. It can be tiny and still be large as a galaxy. This is regarding the quantization – up or down, we didn't give a value to it. Split an atom wrong and see what happens, it will blow your shit up. Create a galaxy and make it fall on your house: it won't go good. Both can be cataclysmic.

34m

Differential. Is same up and down as in Etch-a-Sketch.

You can't have a bias as to which way it goes, but you can be based.

Eg. This is where I am, this is x, this is y, this is what we're working with. Then go from there

and show your work. And you will be able to peek through keyhole and see Meissen bobblehead on mantle.

36m

Now you're going to get to the Osterhagen Key because you're all running out of grease. Do you realize how impossible it is that Bob makes this a free-for-all? He wouldn't do this if he didn't know something. Y'all don't be foolish. Don't take for granted.

1900h

@Bert

We'll need Whole armor of God to keep aliens from attaching to us.

Hippocampal theta process

Ring 9 - higher emotions

You've got to have cholesterol

Pituitary gland needs to change

Cholesterol stops you from bleeding out.

Fractal of lymph system

Fractal is engagement of last run of completed state, fear factor: I'm going to ascend because I'm afraid not to.

5m

PCR tests and mRNA

Taking the vaccine means you're no longer human, you're property of the patent

This is MIR 101: Changing polymerase in system, making different kind of cell. I don't know why she swallowed the fly...

PCR test is to see if they can clone you.

Today there's no value of life.

11m

Trump's uncle gave book to Barron (there's no time)

14m

Why they're cloning people. They don't see value of life in people.

They can grow a whole human in 17 days but don't have much value, can't reproduce.

They will be walking around in public.

21m

Cloned humans becoming aliens

If you don't have minerals right, you don't have a prayer.

Tech Body is doing real good this week.

23m

Don't take the PCR test

Cells are important. Polymerase.

Joseph Smith mormons

26m

Relax your vision to see big picture

27m

Federman is a hologrammy

28m

Clones can do OA movements, even machines can as in OA show.

30m

You have to figure out how to get from Henry 8 to Queen Victoria

32m

Whatever news is from the right or left, look the other way. Everything is absolutely a distraction.

35m

Pentagon aliens about to release huge info dump, Snowden about to go up the food chain. Why aren't people talking about Yellowstone. All the animals there are running for the hills.

39m

What is the thing we should be notice beyond the distractions.
Every detail regarding infiltration of this world as you know it.

41m

@Bert

Half the people from each timeline. Are we the old or new?
Heart on left side – that's the old crew. The new ones will fight you on Mandela Effect items.

44m

This is because of whore swallower at CERN; made split for folks to come back and forth.

46m

If we're all travelers slipping in and out of many worlds, how is it that we're all here merging with the new crew from other world?
Because now we're all in the end of the line, aria.

Valley of Meggido

New worlders are like kum-bay-ah, eliminate plastics.

52m

New world is where Mr. GoodBob came from

Him staying here stops him from getting ahead of something in the other world, because timelines are not set.

There is no time. Chad is working on that, so he can see it with symbols and let the lotus flower bloom. This is individual process.

55m

@Kate

Should we be like Bob at all?

No. Do not be like Bob at all.

57m

Everyone who gets vaxxed will die or become walking dead.

58m

TikTok will probably make it just fine.

59m

Where is the beginning of Bob bacteria? Ophanel Hobab

You need it as little man. When you change it will go away.

Tailgate

How does Chad experience being in the old world and the new world?

Because he is split born. Both sides of the Mandela effect are native to him.

iON told him that in 2010 for such a time as this.
