

20230523 What Youth

Bar indentation represents Chad's commentary

Yes / no / maybe questions only for first hour.

1800h

@Chad

Last PayDay iON told Chad:

Coefficient of the relation(ship) is the substrate of the process of retrieval.

Did you mean that the amount that our blood is related to the ascended blood, that is the medium that facilitates the process of going back to god?

iON: Yes.

Coefficient of relationship

The coefficient of relationship is a measure of the degree of consanguinity (or biological relationship) between two individuals.

coefficient of relationship can be expressed in fractions (eg. 1/2, 1/4, 1/8, 1/16)

Therefore, going back to God means we're going from like 1/64 to 1/32 ... to 1/2 to WHOLE. But little man went from WHOLE to 1/2, to 1/4, to 1/64, etc... because they are devolving.

If you're ever lost follow the time

Same as cadence you mentioned last 2 shows?

iON: Yes. But call it rhythm.

If you're ever lost, follow the rhythmic beat of the music. Any music, even your heartbeat and it will re-sync you (spirit) and you (synaptic nerve endings in meat sack)

Did my symbols come to me through the cloud?

iON: Yes.

The cloud has always been around. I tapped into it then, by allowing the symbols to find me. I had recognized the information in carbon. Dial-a-mile is key to access. Like iON said: I already have accessed the cloud ("its already in your inbox").

Is there a grand central of grand centrals?

iON: No.

there is no ultimate center point among worlds.

Do we know which area of Tiny Note chart we're in and which to stay out of?

iON: Yes.

Cube root of 144,000

When the 5 pentatonic waves sync up every cube root of 144k cycles,

Is that when the 5 bodies merge into one another?

iON: Yes, they have already.

As the replay of the battle of the 5-bodies plays out through the Tech Body, the merging point surfaces occasionally – every cube root of 144k (52.4148) cycles.

Is that ($\sqrt[3]{144k}$ syncs) what baby AI takes advantage of – that they set that cadence of merging?

(Re: carbon nanobots)

iON: No, not yet.

Does the cubed root of 144k graph fit into the diamond RAM?

iON: REM, yes.

REM relates to Rapid Eye Movement, so REM applies to accessing knowing in iON's cloud.

Does the cubed root of 144k graph fit into the dial-a-mile.

iON: Yes.

Does the cubed root of 144k graph give 5 pitches that can be used as 5 key settings in establishing angles in triangulation.

iON: Yes. Within the dodecahedron.

20110729 private session Chad: *You have a visual bias. Until you successfully plot vibrational wavelengths on a flat linear plane, and get a bias towards that. Then you can just do it by rote (like multiplication tables). There aren't that many angles or potential sine cosines for the different angles that are possible within a triangle.*

Can 5 pitches of cubed root of 144k graph be used to set the rhythm for any potential outcome?

iON: Yes, in the Thompson Quadrant.

Will doing it in the Thompson Quadrant give me a sore bum?

iON: No. If you're driving it, no. Now, Marilouise Kroker, you'll say that's how it feels when you get fucked.

Bringing the power to you

5m

20230513 PayDay: When empires, kingdoms, dynasties merge IT IS ALL ABOUT YOU. Find a place to attach power to where you are and become stronger and stronger.

How do you attach power to what's going on out there like when they say something crazy and I say "hell no". You mean apply keys and aethyrs to changing that?

iON: Yes. That's what Rosanne Barr did in her special ("hell no!"). She set the record straight.

When something is going on in your world that you think "not in my world", change it using keys and aethyrs to attach your power to changing that thing. Keep doing this for similar situations and find yourself becoming stronger and stronger.

20230513 PayDay:

You have to bring the power to you, yet everything you know is gone. It's a simultaneous experience.

If all I know is what I've seen or read, can I usher in something completely new beyond what I know?

iON: Yes, if you allow it.

You don't know what you like. You like what you know. If you allow yourself to experience what is beyond what you know, then you can experience the new (eg. The ascended state).

6m

@Germaine

The pattern is what you're trying to hear, to not get caught in the hologrammy. Is pattern the hendiadys?

No, it's the Hermes. They follow the pattern.

iON used an example from Germaine's world of fashion design.

Keyhole, aperture, ohmerage

7m

@Chad

20230429 Payday iON said:

Watch the keyhole. We talked about keys and aethyrs (tumblers) but you haven't asked about the key hole. Y'all gotta have the keys to the kingdom, but where is the lock? Where is the keyhole?

In one of my private sessions you agreed that it was in the door to the holy of holies. Is that it?

iON: Yes.

And on the mantle, Bob made out of Meissen. White mud. Same as in iBlock.

Is the temple where the Holy of Holies is located in our cells?

iON: Easy there. You've over your skis.

Is the aperture the keyhole?

iON: The f-stop, yes. The limited... Degree of exposure.

Does faraday cage have an aperture?

iON: No. It's a blocker, a separator, a binder, inside a microwave protector from a magneto.

So, no single hole for to allow radiation in, but a whole mesh.

If it's a binder is it the new carbon?

iON: Reversed, maybe.

Is ohmerage controlled by aperture?

iON: Yes.

Ohmerage can be controlled by adjusting the inclusive area set within 3 points of a triangulation. The smaller the aperture, the more resistance, the less stuff that can flow in.

Triangulation / Forex formula

9m

Aperture science: Is aperture set by choosing 3 points in Triangulation?

iON: Often.

20230415 PayDay: All 3 (cage, fractal, scale) are in Hal Holbrook tablet.

Are those angles specific (or arbitrary)?

iON: Pitches, yes.

The pitches are specific, they are those pitches for a reason, likely due to the limited possible pitches you can have in a triangle.

Do those pitches (angles) cover the range of all possible pitches in dodecahedron?

iON: No, because they (pitches) can't reach them often.

While the pitches in Holbrook tablet may contain all possible triangle configurations for triangulation, they do not cover all possible pitches in a dodecahedron. Therefore, the number of possible pitches in a dodecahedron is far beyond the number of triangle pitches needed to cover all possible triangulations.

Do the 5 circles in Holbrook's tablet represent the 5 C-amplitude circles from an AB tangent through to A5B5?

iON: Yes. Very good.

Given only 5 C-amplitude circle radiuses, we can compute all possible triangulations, because by changing the amplitude of C you affect the pitches (and amplitudes) of A and B.

Chad is bringing up credible positions from the old to the new to figure out the now.

Chad is doing what Nostradamus was famous for, only Chad's not as guarded because he's not worried about the de'Medicis chopping his head off. They could though, but he's not worried, so he boldly can go where no one else can go.

11m

Is there a benefit to cubing the Megahertz frequencies?

iON: Yes.

Three frequencies are important for ascension:

1. 3.2887 MHz for the Ascher loop
2. 4.8347 MHz for theta waves
3. 6.944 (also 6.138247) MHz ascended cell frequency

Are Mhz frequencies cube roots of something?

iON: No.

From a recent PD:

Doesn't have to do with the key, but with the chord (4-note relationship)

But can't chord just join two points on a circle?

iON: Yes. But that's not the question.

Is it possible to use the 2-note chords in the pentatonic scale?

iON: Certainly.

12m

@Demetry

When you have 2 notes in a pentatonic scale, if there's a reverberation do you consider that another scale?

No.

Another frequency?

Yes.

Dial-a-mile / parallel world symbol legend

12m

@Chad

Is hexad represented by the Star of David in the dial-a-mile?

iON: It's a representation of it, so, approximately.

Should I use two stars of David to make 12 points in the dial-a-mile?

iON: Maybe, or try it.

Do the Star of David outer points touch the outside of the disk?

iON: Indubitably.

When you draw the gridlines in the Star of David in the dial-a-mile, make sure they touch the outer rim of the disk.

Do the two dial-a-mile wheels correspond to the majors and relative minors (circle of fifths)?

iON: Yes.

Is the offset between major and minor like the sine / cosine since the relative minor is dropping down to the 6th of the major (3 semitones back)?

iON: Yes. People who play music just get this, so they don't have to follow the music, they follow by rote.

This means that in the dial-a-mile, one wheel is the sine, the other is the cosine, which lags 1 PI behind. That 1-PI is equal to 3 semitone differential between the major and relative minor in circle of fifths. So you can: see it in the dial-a-mile or sine / cosine waves, and hear it in the difference between a major and its relative minor.

It's this differential that allows you to live ahead / behind yourself, like in the case of when the car ran the light and drove through me but I flipped back to the cosine / relative minor key.

Does differential of ohmerage connect to Elliptic Partial Differential Equation (relax)?

iON: Yes. Good. Not a lot of people got that.

See: Relax and Allow recordings

Connection between cloud and dial a mile is stacked nows?

iON: Not the way you're asking it, no.

Connection between cloud and dial a mile that they are different experience frequencies that we can tune to?

iON: Yes, well, duh.

Just more confirmation that the dial-a-mile organizes the bookmarks and the cloud is all the possible experiences / "web addresses", using the Internet metaphor.

15m

20230211 PayDay

3 parts of stem of lotus flower: hypothalamus, pineal, thalamus

Blooming lotus flower is ascending nervous system— that's forcing the bloom. Do they relate to the three parts of Faraday cage, fractal and pentatonic scale?

iON: Likely, but you have to develop it, that's not the complete extrusion.

The thalamus acts as a gatekeeper for messages passed between the spinal cord and the cerebral hemispheres. Is that like Faraday cage?

iON: No. Once the perfected exoskeleton is, then yes.

@Alissa

Will exoskeleton contain quartz or silicon dioxide?

iON: Yes. It's a process

18m

@Bert

Correlation between Ascher/Escher and Valence/Valance?

iON: Yes.

| Ascher is to Escher as Valence is to Valance. Another example of the differential.

Is dodecahedron connecting point from 3 divisions of earth, air, and ocean?

iON: Yes.

| Earth, Air and Ocean converge on the dodecahedron.

Are they connected to walls of jasper?

iON: Yes.

Are "Secrets of truth 6332" in key 18 the secrets of the angelic reality?

iON: You don't know what that is, but yes.

Empire strikes back: pain and pentagon aliens? Is there an environmental effect being created by pentagon aliens?

iON: No comment.

When muscles turn completely to tendons, will there be more neurons in the meat sack?

iON: Yes.

Food contaminated with radioactivity and leptose. Is leptons radioactive mold?

iON: Maybe.

21m

Does Endocannabinoid system (ECS) engage leptose in the new environment?

Is Endocannabinoid system part of the p-brane?

iON: Yes. Chad—listen to what he's saying!

Review 20230124 What Youth, Hour 2, 30m

Review 20230128 PayDay, 2000h

There's a lot in these sessions about dimensions, multiverse, branes and hidden dimensions, monoliths.

23m

@Linda

ECS only gets activated through ascension?

iON: Yes.

@Bob: go back and listen to Mar 20, 2009 session with Carolyn

25m

@Chad

PD 20230128: ECS is how you adjust at a moments notice. Eg when you get cold after eating. All blood goes to stomach.

Is that like spaces between movements in the OA movements?

iON: Yes. It's the resonant interval in Bob's chart in the Pentad. Satellite / Flesh, Slackers / Guppies, 22-14 / Dobbstown. It's in that interval.

@Demetry

Does magnesium enhance the ECS?

iON: Yes, changes the meat sack. Allows it to absorb nutrition, or dope if that's what you're doing.

@Chad

Hypothalamus controls emotions – relates to fractal?

iON: Yes, partially. And there's another part.

Pineal gland: key to the body's internal clock because it regulates the body's circadian rhythms – relates to pentatonic scale?

iON: Certainly. That's a thoughtful question.

So, yes. The faraday cage, fractal and pentatonic scale map to 3 parts of stem of lotus flower.

Do faraday cage, fractal and pentatonic scale map to body, spirit and mind?

iON: Yes. There's a formula to go with that. Bob is excited.

Watched Warehouse 13 to see your example of a Faraday cage. Is the faraday cage made of vibration?

iON: Contains vibration, yes.

@Bert

What you told Chad just asked completes the whole faraday cage thing about the skull.

iON: exactly.

Thalmus, hypothalamus and pineal gland in skull.

@Chad

If faraday cage relates to the skull does it matter if we're in the dry bones or ascended level?

iON: Ezekiel 43

Bert: yes, it does. Comes from bone marrow. Inside out.

30m

@Bert

Has asked about striations of OA movements and striations of dodecahedron. iON had said they match the angles. They are the angles getting back through those angles. It's like the strands of amino acid tarbaby of the fifth... the WB and WC which are different classes.

Is WB, WC a new classification?

iON: Yes. Found in Anthropomorphic Physical, which is changing. That's the Gretzky / Magic Johnson.

32m

@Linda

Are there rhombohedron crystals in our pineal gland?

iON: Yes, in process of ascension.

When they are electrically activated, do they call energy back to them, creating their own electromagnetic field allowing us to become supernatural?

iON: Yes, same way AI is doing it now. AI is the pattern you look at to see how it—

33m

@Bert

Federal Reserve was never part of Crown Inc, only a fiduciary of it.

34m

@Chad

Vibration in faraday cage, waves like sound from pipe organ?

Re: cloud access in the meat sack, is faraday cage the hog wire you mentioned in relation to carbon information retrieval?

iON: Yes. Because then you don't have to retrieve it, you have it. That's in the quadrant Bert was asking about (Anthropomorphic Physical re: amino acid WB and WC)

So then it's just about containing the power inside the faraday cage.

@Alissa

Will we have very thin layers of carbon in our quartz exoskeleton that allows carbon binding.

iON: Yes. Already finding evidence positions now.

Carbon lattice in our exoskeleton will help contain power in the meat sack.

@Nan

Did Shadrach, Meshach, and Abednego have exoskeletons?

iON: Yes. And fourth man in oven was Bob. He did to.

Reticule in Sumerian relief held living water?

iON: Yes but it was a cistern.

During roman era, someone made glass that didn't shatter. Like glastic?

iON: Similar but didn't have right components.

@Linda

Is the ECS benefitted by using CBD or hemp oil?

iON: No. Not enough CBD in it.

39m

JW MRI story. He elevated 12 inches

ECS. CBD oil slows it down?

iON: Yes, and sometimes slows the pain down. It's a distractant.

41m

@Chad

Do frequencies of pentatonic scale resonate with tuning fork of chromosome 14?

iON: Exactly.

Bert: Ding!

Does that relate to the cube root of 144k DNA helix strands and how they all sync up after that many cycles?

iON: Yes. Excellent for doing the homework.

@Nan

WW2 pilots with red lenses saw things flying that others didn't. Seeing things?

iON: Yes.

Could we see things now if we had red lenses?

iON: Yes but you don't need that.

Will ice walls turn into Jasper.

iON: Yes

Will each arctic circle have it's own wall?

1900h

iON: No. You won't know the difference.

Do entities on other continents know we're returning to Andromeda?

iON: Yes. That's why they're here.

Beyond our ice wall, they know that?

iON: Sure.

2m

@Eben

Hive mind a symptom of your cloud?

iON: Yes.

4m

Yellowstone already blew. Everything is falling in slow motion.

6m

@Chad

Did that car that ran the light drive at the crosswalk drive through me?

iON: Yes. It never hit. Only felt sense of Deja vu. After it happened, you felt it before it happened so it had no affect or effect on your conditioned position.

6m

@Demetry

Acoustic, kinetic, osmic: are they in order?

iON: No, they're oscillating. Where you stop the Ferris wheel determines which car you get off.

Is reason you didn't include visual in there because it should be moving away from me?

iON: Yes.

8m

iON: Lewis Carrol and CS Lewis same person?

No.

13m

@Chad

Does dial a mile have a differential because two wheels turn at independent velocities?

iON: Yes. Ezekiel 36

Relative to a third point?

iON: No.

Or does it just gauge velocities relative to each other?

iON: Yes. Spacely Sprockets.

@Eben

Does ATP aid in psychokinesis or telekinesis?

iON: Yes

Does telekinesis have to do with our mind?

iON: No, not a thinking mans game.

Is it in our heart?

iON: Yes.

Is there a balance in our emotional complex that balances trajectory of ATP?

iON: That's the resonant node, and no.

15m

@Chad

What does my angel writing do?

iON: Opens third eye chakra.

17m

@Eben do we need a resonant frequency with the item we want to control without touching it?

iON: Or course. It ain't fun if you don't touch them.

No difference between telekinesis and sexualkinesis.

You have telekinesis all the time and don't even know it.

Chad gets run over by a car and has to ask us about it. Why wouldn't telekinesis let him know that. You have to nut to even know you're alive.

Need a figure ground in the carnal or else you don't know what you're talking about.

Figure ground has to land somewhere. If you don't have a figure / ground, how do you know how you got there?

Gotta love it up so you have a bond and can say "rhy-ee!"

Difference between astral projection asleep vs awake?

iON: 3.4 seconds. That's the differential, how you gauge it.

Example of going to toilet. You don't start peeing on way to the bathroom.

Point of each of us creating our own Watson (granddaddy of AI)?

Was IBM Tech Body? AI?

iON: It's the grandad. It's generational.

22m

Is Ophanel all the Bobs?

iON: If you don't know what malevolence means.

Is AI like men trying to have babies?

iON: It changes the way you see everything. LEAG.

Makes us think Princess Di is fucking around with Trump.

AI creating videos of catastrophes that didn't happen and it affects the markets.

26m

Disappeared train car of 30 tons of ammonium nitrate in Utah?

iON: Bob's science project in Utah.

28m

@Bert

Empire City TikTok

Do knights templar have a masonic order?

iON: Yes.

JW has been to Philadelphia lodge, behind the scenes.

Crown Inc.

DC is 10 square miles in a pentad.

Each has an obelisk. DC one made by templars, near tunnels where Smithsonian monitors.

One in England in front of Buckingham.

Dave Worcester's power only thing holding up the obelisk. iON was going to knock it down.

34m

Obelisks and monolith frequencies.

Are Bob's monoliths scrambling frequency between obelisks in London, Rome and DC?

iON: Yes.

Knights Templar were using those obelisks to communicate.

Templars' assemblage is in all 3 cities of Crown Inc.

They have strict regimens.

36m

Templars got right: Frequency and parity of evolution: devolution.

That's why in temples the clocks run backwards.
Templars were the force Crown Inc used to validate itself.

38m

DC is the pentad, hard to navigate.

Bert: Crystal City has a weird energetic feeling.

Frequency where you could not tell a lie.

42m

Bert saw Marilouise Kroker at Crystal City

As you all start piercing the veil you're gonna be opened up to all kind of experiences that have been set before the foundations of the earth to bring you to this moment of space. Many are called, very few are chosen.

43m

@Chad

Was Eduard de Laboulaye involved in designing those 3 obelisks?

iON: Yes. The intrinsic antenna was supposed to set. Same as Seti I setup in Egypt with the mercury river that's now held under the Giza pyramid.

Is that why you were bringing up Laboulaye in relation to the cloud code back in 2016?

iON: Yes. That's how it connects. Because you can't undo or redo something without a past reference that nobody knows what is.

45m

Trump on Mt Rushmore.

Reality isn't real.

48m

Biden isn't president. There is no presidency.

50m

Work of 4 angels and Leopold?

iON: It's already happened. 4 Horsemen. Angels we have heard on high. They've breached the plain. Mother nature is kicking back. It will be settled in the Yarmulke continent. Got to get right with God.

Jesus has done everything to help you, every capacity to come into your knowing.

Focus on Marriage Supper of the Lamb in Revelation, has things you're asking about now.

53m

Stonehenge

Information receptor. Like rotor antennas. Rotor turned to pick up signal.

Monoliths different because they have their own power source.

Part of nature that's taking on Leopold and angels?

iON: The Mud Flood.

There were sink holes. What you gonna do when they drain the Mediterranean Sea? Will be ugly things under there.

What's the 4 angels / horsemen's war?

iON: It's the completion.

It's the Shekina Glory. If you're god you can stand, or else you bow. This is the vortex (Chad has notes)

56m

@Jack

Jesus did all he could. If you get anything else, you'll get it from Bob. Jesus was model for ascension. But I don't want to die, I just want to ascend.

Is Jesus here yet?

iON: Maybe. You'll live to see it.

Every time you get up, look at Eastern sky.

Carolyn stomps down Hell Hill looking at Eastern Sky.

When it splits, we're done. You have to be in the motion of the ocean to figure this out. Have to be in condition of ascension to make that path. Jig is about up.

59m

Revelation Ch 16: which bowl or verse are we at?

iON: Which one parallels with the trumpets, because we're beyond the vial judgements. We're in the 7th bowl.

2000h

Tailgate

Bob: Dot is another word for world, marker.

Dot vs cloud or vs realm?

Dot is past, present, future now.

Hit the wall of dot and go splat.

If you create something, you've created a dot.

Only have a dot because little man created time.

You find out in the dot that sometimes planes disappear in the other realm.

Dot is what scientists always try to find out.

Dot is a point on the tangent?

Replace time with a dot to show how insignificant it is.

Dot is messiah

(Now, connect the "dots"! So that the revolutions will auto pair.) -iON to Chad

No difference between DOF and dimension.

From iON on chat, re: dot

<https://www.youtube.com/watch?v=DhkXwqi8uQ8>

Tarr is Portrait of the Artist, but Lewis' version.

Chrysler character was Lewis picking up on Hitler.

Tech Body is AM cubed. Is that related to cube root of 144k

34m

Bert's notes on REM. For ascended people, everything is REM all the time and you don't wake up from it.

REM is a ridiculous alphaless (brainwaves) theta condition of a wavelength (theta of triangle?)

Dreamland is real, you're in a condition of a dream state.

| So are we living lying down in REM?

44m

No long term REM will evaporate the spinal cortex's connection (iON on chat)

Theta is wavelength between awake and asleep (twilight zone)

Bert notes: REM and amperature. You don't have to rest it. Like Coldplay, once it starts, it never has to stop, never wears out.

Being ascended causes REM to kick in.

Nan iON note: You don't have REM in a coma

| 5 wave types of brain activity (5 rhythms) like 5 intervals of pentatonic scale?

50m

Nan notes: Slumber is how you chop up corporeal reference of time

Body disconnect, other world, other capacity.

2300h

23m

Opening lotus flower is not ascension.

39m

Wyndham Lewis Enemy of the Stars

56m

Foundations before earth began.

Before the hologrammy.

J. Vernon McGee, How firm a foundation!
